TAJ ALMUSAWI

Computer Science Student | Aspiring Systems Developer

Saudi Arabia | E-mail: almusawi.tajcs@gmail.com | Phone Number: 0561914920
LinkedIn: linkedin.com/in/taj-almusawi | GitHub: github.com/TajCsDev

PROFILE

Computer Science student at King Faisal University with practical experience in HR process automation, internal training system design, and web application development. Interested in process and system automation, systems development, and data analysis to improve business operations and support informed decisions.

WORK EXPERIENCE

Cooperative Trainee | Alrashed Industrial Company **Jun 2026 - Present**

- Automated selected HR workflows and supported recruitment and employee-data processes.
- Developing an internal training management system for factory-level reporting, course tracking, and compliance indicators.
- Collaborated with an external provider to develop the recruitment website in line with the department's hiring workflow.

PROJECTS

Graduation Project AI Tour Guide App **Completed**

- Developed a FlutterFlow and Dart app with AI recommendations, a chatbot, Google Maps navigation, and Firebase-backed data.

TruthGuard AI

- Built a Python-based news credibility classifier using NLP and machine learning to analyze and classify text.

Training Management Dashboard

- Built a React, TypeScript, and Tailwind CSS dashboard interface with factory filters, training KPIs, compliance indicators, and items requiring attention.

EDUCATION

King Faisal University, Saudi Arabia **Jan 2021 - Dec 2026**

Bachelor of Science in Computer Science | Expected Graduation: December 2026

SKILLS

- Programming Languages: Python, TypeScript, JavaScript, SQL, PHP, C++, Java, Dart.
- Web & Mobile: React, Tailwind CSS, Flutter, FlutterFlow.
- Backend & APIs: Firebase, REST APIs, OpenAI API, Google Maps API.
- AI: Machine Learning, NLP, Prompt Engineering, AI Agents.
- Tools & Platforms: Git, GitHub, Canva, VS Code, Figma, Jupyter Notebook.
- Core Concepts: OOP, SDLC, Database Management, Software Testing.
- Soft Skills: Communication, Teamwork, Problem Solving, Analytical Thinking, Adaptability.

CERTIFICATIONS

1. Cybersecurity Fundamentals (IBM) - Basics of threats, vulnerabilities, and core security concepts
2. Artificial Intelligence (IBM) - Core AI concepts, machine learning basics, and real-world applications
3. AI Agents (IBM) - AI agent systems, automation, and intelligent decision-making
4. Flutter & Dart Development - Mobile app development using Flutter framework (in progress)
5. CompTIA Security+ (Self-Study) - Network security and risk management fundamentals (in progress)

ADDITIONAL

FIELDS OF INTEREST

- Software Engineering | Artificial Intelligence | Data Analysis | Mobile Application Development
- Process and System Automation | Systems Development

ADDITIONAL EXPERIENCE

- Four years of professional experience in a customer-facing environment

LANGUAGES

- Arabic - Native | English - Professional Working Proficiency
