SUMMARY

Computer Science student (B.S., King Faisal University, Dec 2026) with hands-on experience analyzing business requirements and designing, developing, testing, and documenting information systems across the full SDLC. At Alrashed Industrial Company, building an internal training management system: gathering requirements from HR stakeholders, translating business processes into system workflows and functional specifications, implementing features, automating HR workflows, and maintaining data integrity and technical documentation. Skilled in Python, SQL, Java, TypeScript, React, Flutter, and Firebase, with REST API integration experience and strong problem-solving and communication skills from four years in customer-facing roles.

WORK EXPERIENCE

Cooperative Trainee, Systems Development - Alrashed Industrial Company | Jun 2026 - Present

- Analyzed and designed an internal training management system, translating HR and compliance requirements into system workflows, data models, and functional features.
- Gathered and documented business and functional requirements through meetings with HR stakeholders, and mapped current processes to identify gaps and improvement opportunities.
- Developed system features including factory-level KPI reports and interactive dashboards that turn training and compliance data into actionable insights for management.
- Followed the SDLC from requirements gathering and system design through implementation planning and test execution to support reliable system deployment.
- Automated selected HR workflows and procedures to streamline recruitment and employee-data management processes.
- Maintained database integrity and ensured seamless data flow between system components to support reliable reporting.
- Helped develop procedures for routine data audits and validation checks, improving data quality and accuracy across the system.
- Collaborated with HR stakeholders and external providers to define requirements and implement a recruitment website aligned with hiring workflows.
- Maintained comprehensive technical documentation for requirements, system design, and testing procedures, organized for future maintenance and reference.

Customer-Facing Experience | 4 Years

- Served customers in a fast-paced environment, understanding their needs and resolving inquiries, building communication and problem-solving skills.
- Developed organization and teamwork capabilities through high-volume customer interactions.

PROJECTS

Training Management System & Dashboard | React, TypeScript, Tailwind CSS

- Designed and built a web-based module with factory filters, training metrics, compliance indicators, and a list of items requiring attention, based on requirements gathered from HR users.

TruthGuard AI - News Credibility Classifier | Python, NLP, Machine Learning

- Developed a machine learning and NLP system that analyzes and classifies news text.

AI Tour Guide App (Graduation Project) | FlutterFlow, Dart, Firebase, OpenAI API, Google Maps API

- Analyzed requirements and developed a mobile application with AI-powered recommendations, an in-app chatbot, and Google Maps navigation, integrating a Firebase backend and REST APIs to store and serve data.

EDUCATION

Bachelor of Science in Computer Science - King Faisal University, Saudi Arabia | Jan 2021 - Dec 2026

CERTIFICATES

Cybersecurity Fundamentals - IBM | Artificial Intelligence Fundamentals - IBM | AI Agents - IBM | Data Analysis with Power BI & Microsoft Excel (In Progress) | CompTIA Security+ (In Progress) | Flutter & Dart Development (In Progress)

LANGUAGES

Arabic (Native) | English (Excellent oral and written command - Professional Working Proficiency)

SKILLS

Systems Analysis & Design: Requirements Gathering, Business Process Analysis, Functional Specifications, System Design, Workflow Mapping, SDLC, System Implementation, Technical Documentation
Development: Python, SQL, Java, TypeScript, JavaScript, Dart, React, Flutter, Tailwind CSS, HTML/CSS, REST APIs, OpenAI API, Google Maps API
Databases & Data: SQL Databases, Firebase, Data Integrity, Data Quality, Data Audits, Reports & Dashboards, KPI Reporting, Power BI, Microsoft Excel
Testing & Automation: Software Testing, Testing Procedures, Process Automation, Workflow Automation
AI: Machine Learning, Natural Language Processing (NLP)
Tools: Git, GitHub, VS Code, Jupyter Notebook
Soft Skills: Stakeholder Collaboration, Communication, Problem-Solving, Teamwork, Organization
